

claude-seo.md

A live crawl of the site, checked by rules, judged by Jev, scored by code and explained in plain language.

22 September 2026 · 60 URLs crawled · 825 Jev judgments · Jev cost \$0.0198 · DataForSEO \$0.3163

What matters most on [claude-seo.md](#)

[claude-seo.md](#) scores 93 out of 100. The technical areas score 98 to 100: no HTTP errors or broken internal links among the 60 crawled pages, a missing URL returns a real 404, and real Chrome users see good Core Web Vitals on mobile and desktop. The crawl stopped at its 60 page cap, so page counts describe a sample.

DataForSEO estimates 61 ranking keywords and about 553 monthly visits, with position 2 for 'claude seo' and position 3 for 'ai seo audit'. The site has 40 referring domains; the large platforms ranking for the same keywords, such as [semrush.com](#) and [ahrefs.com](#), have over 100,000 each (JEV-003), so a direct comparison says little about what is achievable.

The most practical work is on keywords: 4 relevant keywords rank at positions 6 to 19 (JEV-001), and 25 relevant searches, mostly low-volume 'claude seo' terms, have an existing page that could target them (JEV-002). Rule-verified fixes are small: SoftwareApplication markup without the rating Google requires for rich results (JEV-005), a temporary 307 www redirect (JEV-006) and a broken Skool profile link (JEV-011).

What works, what holds it back, what to do

What is working

- Crawl and indexing scores 99 and security 100; Lighthouse SEO is 100 on all three measured pages.
- Jev judged the homepage offer clear: value proposition 1.00, confidence 1.00.
- Position 2 for 'claude seo', position 3 for 'ai seo audit' and 'claude code for seo'.
- Mobile homepage Lighthouse performance 99, with LCP, INP and CLS rated good for real users.
- All 10 AI crawlers checked are allowed by robots.txt.

What is holding the site back

- 4 relevant keywords sit at positions 6 to 19, including 'sxo', 'seo code' and 'seo skills claude' (JEV-001).
- 40 referring domains; the sites ranking alongside it are far larger (JEV-003).
- SoftwareApplication markup on 28 pages lacks the aggregateRating or review Google requires for software rich results (JEV-005); add ratings only if real ones exist.
- www.claude-seo.md redirects with a temporary 307 (JEV-006), and the Skool profile link / @daniel-agrici-3925 returns 404 (JEV-011).
- Jev reads the homepage H1 'YOUR SEO TEAM IN THE TERMINAL.' as not naming the topic (JEV-007), although it rates the offer as clear; treat this as a wording suggestion.

Plan

This week

- JEV-011 Fix the Skool profile link (hours)
- JEV-006 Make the www redirect permanent (hours)
- JEV-009 Replace 'LEARN MORE' links with descriptive anchor text (hours)
- JEV-010 Add width and height to the 20 images on the 4 listed blog posts (hours)

This month

- JEV-001 Improve the pages ranking at positions 6 to 19 for their keywords (about a day)
- JEV-002 Cover the 'claude seo plugin', 'claude seo audit' and 'claude seo skill github' searches on the pages Jev mapped them to (about a day)
- JEV-005 Add real ratings to SoftwareApplication markup, or accept that software rich results will not show (hours)

This quarter

- JEV-003 Earn links from Claude Code and MCP directories, roundups and original data (a project)

Keyword volumes, difficulty and traffic are DataForSEO estimates from a collection at 2026-09-21T23:24:36+00:00; connect Search Console for measured clicks. Items about AI Overviews and answer-first writing (JEV-004, JEV-008) are editorial heuristics: Google states no special optimization is required for its AI features.

Written by: Claude, from the audit evidence.

A source finds, code decides, Jev judges, Claude writes

Each stage does only what it is good at. Anything a count, a status code or a string match can decide is decided by code. Jev, TypeSafe's System One model, answers narrow typed questions about meaning, with probabilities. Nothing is invented to fill a gap: missing data is shown as missing.

Who decides what

STAGE	OWNS	NEVER DOES
Code	Crawling, status codes, counts, duplicates, schema parsing, formulas, ranking	Guess at meaning
Jev	Page type, search intent, importance, helpfulness, specificity, trust, citability, title and meta fit, competing page pairs	Predict rankings or traffic, invent data, grant permission to act
PageSpeed	Chrome UX Report field data and Lighthouse lab scores	Stand in for every page or device
Claude	The summary and plan, citing action IDs	Add findings that the evidence does not show

What went through each stage

SCORECARD

9 areas, one score

AREA	SCORE	WEIGHT	ACTIONS	HOW IT IS SCORED
Crawl and indexing	99	20	1	Rules only
On-page	99	15	1	Rules plus Jev findings
Content quality	89	20	0	70% Jev judgment (helpfulness, specificity, trust), 30% rules
Links and architecture	98	10	2	Rules only
Structured data and sharing	99	8	1	Rules only
AI search readiness	80	12	2	70% Jev judgment (citability, answer-first, entity clarity), 30% rules; editorial heuristics, since Google states no special optimization is required for AI features
Performance	98	10	1	50% Lighthouse mobile performance, 50% crawl observations
Security and trust	100	5	0	Rules only
Search visibility and authority	82	15	3	DataForSEO rankings, keywords and backlinks, filtered by Jev relevance

PRIORITIES

What to fix first

Impact combines severity, how many pages are affected and how important Jev judged those pages to be. Effort is a planning estimate, not a quote.

Each dot is one action; labelled dots are fix-first or high impact. Colour shows priority.

ID	ACTION	PRIORITY	IMPACT	EFFORT	PAGES	BY
JEV-001	Relevant keywords close to page one	P2 Plan next	100	About a day	4	DataForSEO
JEV-002	Relevant keywords an existing page could win	P2 Plan next	100	About a day	25	DataForSEO
JEV-003	Far fewer referring domains than sites ranking for the same keywords	P2 Plan next	100	A project	1	DataForSEO
JEV-004	AI Overviews that do not cite the site	P2 Plan next	33	About a day	2	DataForSEO
JEV-005	Structured data missing properties Google requires for rich results	P3 When convenient	26	Hours	28	rule
JEV-006	Host or HTTPS redirect is temporary (302 or 307)	P3 When convenient	20	Hours	1	rule
JEV-007	Main headings that do not state the topic	P3 When convenient	20	Hours	2	Jev judged
JEV-008	Pages that bury the main point	P3 When convenient	18	Hours	4	Jev judged
JEV-009	Internal links with generic anchor text	P3 When convenient	17	Hours	2	rule
JEV-010	Images without width and height	P3 When convenient	17	Hours	4	rule

How the site is linked

Pages laid out by clicks from the homepage. Bigger dots are pages Jev judged more important; the outer dashed ring holds pages that no crawled page links to.

Where the site ranks today

Google rankings, estimated traffic and links for `claude-seo.md` (location 2840, language en).
Traffic is DataForSEO's estimate from rankings and search volumes, not measured visits.

Keywords worth winning

DataForSEO supplied keyword ideas, suggestions and competitor gaps. Jev kept only those relevant to this business (0.66 or more), dropped searches for other brands, and chose which existing page should own each one, or said a new page is needed.

How sure was Jev?

A Choice or Score answer is decisive at confidence 0.80 or above; a yes or no answer is decisive at P(yes) of 0.80 or more, or 0.20 or less. Everything else is marked for a human check and flagged on its action.

Pages that may compete for the same searches

Code shortlisted 40 pairs with overlapping titles and headings; Jev judged whether a searcher would treat them as substitutes. The most likely competitors are shown; 0.6 or more becomes an action.

Where to invest

Each page placed by how important Jev judged it to the business and how good its content is (mean of helpfulness, specificity and trust). Pages in the shaded corner matter and are weak: improving them is likely to pay back first.

No page is both important (0.5 or more) and weak (below 0.5).

Crawl and indexing 99

HTTP status of crawled URLs	Click depth from the homepage
robots.txt	found · Googlebot allowed · Bingbot allowed
XML sitemap	60 URLs in 1 file(s)
HTTPS	yes · HTTP redirects to HTTPS: yes
Missing page status	404 correct
Rendering	auto; homepage needed JavaScript rendering: no
Crawl limits	60 pages, depth 5 · page cap reached: larger sites were sampled

Actions

JEV-006 · Host or HTTPS redirect is temporary (302 or 307)

P3lowrule

1 affected · www.claude-seo.md answered 307

Fix:

 Use a permanent redirect (301 or 308) for www, non-www and HTTP to HTTPS, so search engines consolidate on one host. [Source](#)

/

On-page 99

Title length. The 65 mark is a display convention, not a rule.

Main content words per page. The 150 mark is a warning sign, not a ranking factor.

Method, sources and limits

Formulas

Area score starts at 100 and subtracts, per finding, a severity amount (critical 25, high 12, medium 6, low 2, info 0) times $(0.5 + 0.5 \times \text{share of pages affected})$. Site-wide findings count as full share. Content quality and AI search readiness blend 70% importance-weighted Jev judgments with 30% rules. Performance blends 50% Lighthouse mobile performance with 50% crawl observations.

Overall score is the weighted mean of scored areas (weights in the scorecard). Unsourced areas are left out, never counted as zero. A blocked site is capped at 20; a site without reliable HTTPS at 60.

Impact = severity weight (critical 10, high 6, medium 3, low 1) $\times (0.6 + 0.4 \times \text{reach}) \times (0.6 + 0.8 \times \text{highest Jev importance among affected pages})$, scaled so the largest is 100. **Priority**: P1 for critical, or high with impact 40 or more; P2 for impact 30 or more or any high; P3 otherwise. **Quick win**: impact 35 or more with effort of hours.

Jev

Model requested jev-latest, returned jev-1.13.0. 78 requests, 470274 input tokens, 0 failed, 0 skipped by the budget cap. Cost \$0.0198 at \$0.042 per million input tokens (output is free). Page text sent to Jev is capped at 6,000 characters. Jev answers are model judgments, not measurements; decisive does not mean correct.

DataForSEO

17 requests, \$0.3163 as reported per call by DataForSEO, 0 failed, 0 skipped by the budget cap; data reused from the collection at 2026-09-21T23:24:36+00:00. Location 2840, language en. Search volumes, difficulty and traffic (ETV) are DataForSEO estimates; positions are organic ranks at collection time.

Limits

- The crawl covered 60 URLs, stopping at the page cap, so site-wide counts describe a sample. Orphan and depth findings only see links on crawled pages.
- Rankings, keywords and backlinks come from DataForSEO's databases, not from Search Console or analytics. Nothing here measures actual visits or revenue.
- PageSpeed lab scores vary between runs. Field data exists only for sites with enough Chrome traffic.
- Rules marked heuristic are editorial conventions, not search engine requirements.
